

2009 SNOW GEAR

MOTOR GRADER • WHEEL LOADER • BACKHOE • TANDEM TRUCK

CRAIG

QUALITY WE STAND BEHIND

Attachments • Built Right • Fit Right

Craig Manufacturing has been an innovative leader in heavy equipment snow gear since 1946

After over 60 years of continuous research and development we are confident that you'll find Craig gear to be the best built, most reliable snow equipment available today.

670 Series One-Way Plow

The plow that started it all for Craig Manufacturing. This medium discharge plow is great for all types of snow conditions including high accumulations on residential streets. This plow is in use from the city streets of New England to rural backroads of Newfoundland all the way up to the high Arctic.

680 Series High Speed One-Way Plow

Featuring a very aggressive conical moldboard this plow has been designed specifically for highway use. The large difference between intake and discharge heights results in superior snow-curl and discharge at high speeds.

0600 Series Hydraulic Reversible Plow

The result of over 60 years of design improvements this reversible is the industry leader in snow equipment for wheel loaders today. The full floating frame follows the contour of the road both laterally and horizontally to ensure maximum contact.

CSP Snow Pusher

Clear large paved surfaces up to three times faster with one of our rugged Snow Pushers. Constructed specifically for parking lot and airport runway usage our design incorporates a precision backframe for maximum strength and ease of hookup.

RCS Ramp Clearing Plow

Built specifically for airport installations Craig Ramp Plows are keeping airport ramps clear and safe around North-America. Custom engineered for ease of use and efficient snow handling these extra-wide plows can be ordered with a variety of cutting edges, including rubber, to protect the tarmac.

SNB Snow Basket

Slotted design creates a large capacity light weight bucket for efficient handling. The slots also allow air to escape when pushing into a large mound of snow ensuring a full bucket. They help release snow when dumping, and allow water to escape when moving slushy or water-logged snow.

Double your loader's snow handling capacity with a Light weight Snow Basket

301 Series All Hydraulic Wing

In the mid 50's Craig Manufacturing was the first company to put a wing assembly on a wheel loader. Ever since this historic event we've continued to innovate and refine our industry leading design. The perfect curvature of our wing moldboard is still based on the magic formula for snow curl and discharge we've used since day-one.

301 Series Hydraulic Trip Swivel

Protect your wing assembly with this cab-resetable hydraulic trip swivel. Replacing the standard bell-swivel on the front post this unit uses hydraulics to allow the moldboard to trip when it strikes an obstacle.

301 Series Push Pole Quick Disconnect

The Push Pole Quick Disconnect allows the complete push pole assembly, wing, and plow to be disconnected from loader by a single person without tools in just minutes.

Equiped with our Quik-Key Coupler and Pushpole your loader can **change jobs in just seconds**

QKM Quik-Key Coupler

The Craig Quik-Key coupler system allows for maximum worksite, and seasonal, versatility. Change attachments in just seconds. Purchase our female blank to add to existing attachments or other heavy jobsite items that need to be moved frequently.

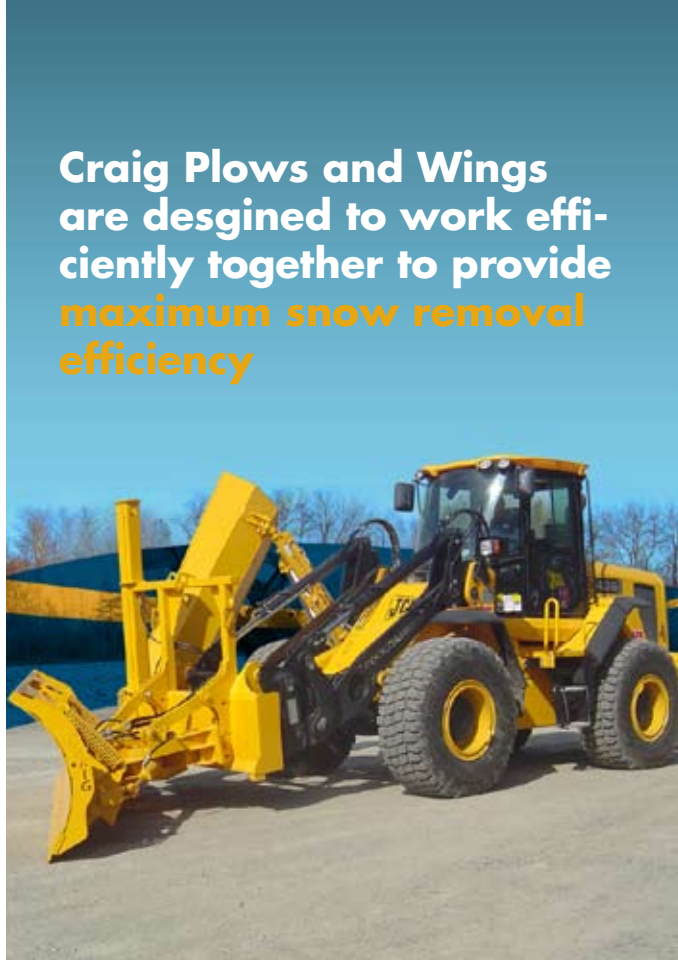

QKM-36 Tandem Truck Quik-Key Plow Harness

The Craig Tandem Truck Quik-Key system is custom designed to work with your truck. A unique back-frame drop system allows access under the truck hood while the Quik-Key changes attachments in just seconds.

VP Vee Plow

Simply the best built, most rugged vee plow available on the market today. Used exclusively for opening some of the worst roads in the north. This plow has been and continues to be a mainstay of government and private industry for ensuring that roads stay clear during the worst storms, or for opening roads that have gone unplowed.

Craig Plows and Wings are desgined to work efficiently together to provide **maximum snow removal efficiency**

The Craig snow wing moldboard features a smooth curl for **maximum snow discharge with minimal horsepower**

**301 Series
All Hydraulic Wing**

The perfect curl of our wing moldboard is still based on the magic formula we found in the 50's for unparalleled snow curl and discharge.

**773 Series
Extra Heavy Duty "D.O.T. Special" One Way Plow**

Based on the 670 this plow is the most rugged one way available today. Every possible wear point has either been reinforced or upgraded to ensure incredibly long life in the harshest environments.

**302 Series
High-Lift All Hydraulic Wing**

Extend the capabilities of your Grader with an all hydraulic high-lift rear-post wing assembly. Featuring an amazing 60" level benching height this assembly allows operators to double-bench snowbanks for more efficient plowing.

**401 Series
Heavy Duty All Hydraulic Wing**

Designed specifically for 40 series Graders and up, this heavy duty wing assembly features all the great features of the 301 assembly in an extra heavy duty package.

**QKMPG
Parallel Quick Hitch Lift Group
(Hydraulic or Manual Pin-Lock)**

The Push Pole Quick Disconnect allows the complete push pole assembly, wing, and plow to be disconnected from loader by a single person without tools in just minutes.

**100/107 Series
Plow Harness Lift Group**

This Plow Harness will accept all Craig models of snowplows: One-Way, Vee Plow, Reversible, and Dozer Blades
