DOZER

FAMILY OWNED SINCE 1946

A trained machinist, Woodford (Woodie) Craig founded Craig Manufacturing in 1946 along with the encouragement and aid of his father, Washington. Operating as a service station and machine repair shop, it was not long before Woodie put his training to work and began fabricating with metal. No project was too big or too small - at one point Craig even built a river ferry. Snow plows and wings on trucks, graders, and loaders eventually became the focus that led to attachment manufacturing.

John, Woodie's only son, joined the family business 30 years later in 1976. The business continued to thrive and the product line expanded with the markets. When a disastrous fire destroyed the entire business in 2005, John used the opportunity to build a larger facility designed with the most efficient equipment and lean manufacturing processes in mind.

Ben, John's only son, joined the business in 2006 adding his energy and training. A new branch was opened in Cambridge, Ontario in 2008 to better serve Central Canada and U.S.A. In 2013 a building was leased to open a branch in Red Deer, Alberta to better serve our customers in Western Canada and U.S.A.

Always striving to improve, Craig Manufacturing endeavoured to expand the Hartland facility in 2015. Completed in 2016, the expansion has allowed for increased production capacity as well as increasing manufacturing capability to handle weldments up to 30 tons.

Continuing a pattern of growth, Craig Manufacturing sought to have their own building in Alberta and in 2017 construction began on a brand new facility in Blackfalds, Alberta. The purpose built facility was completed in early 2018 and the Craig Alberta team made the move to their new home in February. Just a few months following this, plans began for the next Craig location. In October 2018 Craig Manufacturing officially announced their first USA location in Lawrenceburg, Tennessee - open for production in spring 2019.

Over 70 years later Craig Manufacturing still maintains focus on remaining a trusted, quality supplier of heavy equipment attachments who understands and values its customers.

MACHINE

CATEGORY GUIDE

MINI-EXCAVATORS

MX 3.5
Max Operating Weight
4,999 lbs - 8,999 lbs

MX 5.5
Max Operating Weight
9,000 lbs - 10,999 lbs

EXCAVATORS

EX 80
Max Operating Weight
11,000 lbs - 16,999 lbs

EX 120
Max Operating Weight
17,000 lbs - 30,000 lbs

EX 150
Max Operating Weight
30,001 lbs - 39,999 lbs

EX 200
Max Operating Weight
40,000 lbs - 49,999 lbs

EX 250
Max Operating Weight
50,000 lbs - 66,499 lbs

EX 300
Max Operating Weight
66,500 lbs - 87,999 lbs

EX 400
Max Operating Weight
88,000 lbs - 109,999 lbs

EX 650
Max Operating Weight
110,000 lbs - 144,999 lbs

EX 850
Max Operating Weight
145,000 lbs - 199,999 lbs

MINING EXCAVATORS

EX 1200
Max Operating Weight
200,000 lbs - 359,999 lbs

EX 1900
Max Operating Weight
360,000 lbs - 499,999 lbs

EX 2000
Max Operating Weight
500,000 lbs - 719,999 lbs

MOTOR GRADERS

MG 20
Max Operating Weight
20,000 lbs - 29,999 lbs

MG 30
Max Operating Weight
30,000 lbs - 35,999 lbs

MG 40
Max Operating Weight
36,000 lbs - 49,999 lbs

79,001 lbs - 94,000 lbs

CRAIG MANUFACTURING IS AN INNOVATIVE LEADER IN CUSTOM HEAVY EQUIPMENT ATTACHMENT MANUFACTURING.

Offering an extensive line of attachments for heavy equipment, Craig Manufacturing has you covered from light duty landscaping to heavy duty construction and mining. With attachments available on more machines than ever before, Craig is truly your one-stop-shop for all your heavy equipment attachment and service needs. This guide illustrates the wide array of machine categories that we service. Call the Craig Customer Support Center today and discover why we are **your** custom attachment experts since 1946.

EXCAVATOR ATTACHMENTS

EXM-CWL-M MANUAL CONVERTIBLE WEDGE LOCK COUPLER

The Craig Manual Convertible Wedge Lock Coupler features a light weight, low profile design that maintains your machine's OEM tip radius while offering a quick coupling system. This coupler can easily be upgraded to our Hydraulic version with a Craig supplied kit.

EXM-CWL-H HYDRAULIC CONVERTIBLE WEDGE LOCK COUPLER

All the same great benefits of our Manual Convertible Wedge Lock Coupler in a Hydraulic package that can easily be downgraded back to Manual with a Craig supplied kit if needed.

EXM-CQL QUIK LOC PIN GRABBER

Featuring an instant quick locking knuckle, the Craig Quik Loc Pin Grabber - powered by Kinshofer - is the ultimate in pin grabber safety. A unique wedge style design allows the Craig Quik Loc to be light weight and low profile - meaning more break-out force in your pin grabber applications.

EXF-HA HAMMER ADAPTER

Available for all makes and models of hydraulic hammers and plate compactors. Available with Wedge Lock, OEM pin-on, S-Series, or manual bar lock lugging.

EXB-HD / EXB-XHD / EXB-SS EXCAVATOR TRENCHING BUCKET

Built to work for your specific application, Craig Excavator Trenching Buckets are available in three different classifications for all your job site digging needs.

EXB-HD

Heavy Duty Buckets are designed for medium abrasion, medium impact job sites. Recommended for common digging applications.

EXB-XHD

Extra Heavy Duty Buckets are designed for high abrasion, medium impact job sites. Recommended for digging in tough soil conditions.

EXB-SS

Severe Service Buckets are designed for high abrasion, high impact job sites. Recommended for the toughest digging conditions. Custom configurations available to meet your specific tough job site needs.

EXB-HDQF / EXB-XHDQF / EXB-SSQF QUIK FILL TRENCHING BUCKET

The Craig Quik Fill Trenching Bucket is available in Heavy Duty, Extra Heavy Duty, and Severe Service variations. Designed to fill more efficiently, saving time and fuel. Weld-on side cutters come standard.

EXB-HDINT INTEGRATED THUMB TRENCHING BUCKET

Ideal for multi-function excavators, the Craig Integrated Thumb Trenching Bucket comes with the thumb attached to the bucket. This allows the excavator to completely remove the bucket and thumb - reducing weight and saving fuel. The thumb cylinder can then be tucked up out of the way with the supplied retainer or completely removed.

Craig Severe Service Bucket for a Liebherr R980 featuring optional weld-on heel shrouds and side cutters. Bucket is 96" wide with an 8.11 cubic yard capacity.

This attachment has worked 20 hours a day in a quarry in Raleigh, North Carolina since early 2016.

EXB-MASS
MEGA ARMOUR SEVERE SERVICE TRENCHING BUCKET

The ultimate trenching bucket for excavators working in the most extreme applications. The Craig Mega Armour Severe Service Trenching Bucket features extensive plating and wear components in key areas to reduce wear in high abrasion, high impact job sites.

EXB-HDSB
SKELETON TRENCHING BUCKET

The Craig Skeleton Trenching Bucket is designed for separating rocks and other large materials from loose soil.

EXB-DCSB
SKELETON DITCHING BUCKET

Designed for separating rocks and other large materials from loose soil, the Craig Skeleton Ditching Bucket features a profile that is optimized for ditching/shaping applications.

EXB-DC
DITCHING BUCKET

Ideal for ditching and grading, the Craig Ditching Bucket features a wide, shallow, smooth-curl design. Bolt-on replaceable, reversible cutting edge available.

EXB-DCQF
QUIK FILL DITCHING BUCKET

Featuring a lengthened shell floor and curved side cutters, the Craig Quik Fill Ditching Bucket is designed to allow the bucket to be pulled towards the excavator rather than curled like a traditional bucket. This motion eliminates partial fills and excess spillage while also leaving the bucket closer to the open position for quicker dumping of material.

EXB-CL
CLEAN UP BUCKET

Craig Clean Up Buckets feature a larger capacity than our standard ditching bucket and are ideal for cleaning out established ditches that have become overgrown. Available with a straight or serrated cutting edge.

EXB-HADC
HYDRAULIC ANGLING DITCHING BUCKET

Featuring a flat cylinder design to keep the tip radius to a minimum, the Craig Hydraulic Angling Ditching Bucket features 45° of left and right rotation. Bolt-on replaceable, reversible cutting edge available.

EXB-HACL
HYDRAULIC ANGLING CLEAN UP BUCKET

The Craig Hydraulic Angling Clean Up Bucket features a flat bottom design with angled cylinders, to prevent material build up, that offers up to 45° of rotation left and right. Available with a straight or serrated cutting edge.

EXB-HRDC
HYDRAULIC ROTATING DITCHING BUCKET

Offering up to 90° of rotation left and right, the Craig Hydraulic Rotating Ditching Bucket features a Helac rotator for greater angling ability versus traditional cylinders.

EXB-CBB
4-IN-1 BITE BUCKET

Combines all the best aspects of a standard dig bucket, clam grapple, ditch bucket, and chuck blade. With the Craig 4-in-1 Bite Bucket you can minimize the need for additional machines on the job site.

**EXB-BB
BLUEBERRY BUCKET**

Developed specifically for prepping fields for mechanical harvest. The shallow cutting edge pierces the ground and smooths soil underneath established plants with minimal impact on the root bed and surrounding area.

**EXB-FB
FROST BUCKET**

Tear through frozen ground and trench at the same time to cut your winter digging time in half with the Craig Frost Bucket. Adco style teeth come standard for superior ground penetration.

**EXB-CGB
GRAB BUCKET**

An excavator grapple and dig bucket all-in-one, the Craig Grab Bucket is the perfect tool for land clearing and demolition job sites. Features dual thumb cylinders on the bucket for greater gripping force that follows the bucket throughout the entire curl cycle. Bucket not available in the U.S.A.

**EXB-DCTR
TRAPEZOID BUCKET**

Ditch and grade at the same time with the Craig Trapezoid Bucket. The flat, narrow bottom makes it ideal for pipe laying operations and makes for less gravel needed when filling the trench back in. Comes standard with bolt-on reversible, replaceable cutting edges. Flat bottom available with teeth for added ground penetration.

**EXB-PR / EXB-CR
PAVEMENT/CURB REMOVAL BUCKET**

Featuring a wide, shallow, flat design, this bucket is ideal for removing pavement with as little aggregate disruption as possible. Raised segments allow the bucket to slide under surfaces with minimal force.

**EX-CG
CONTRACTOR GRAPPLE**

A solid boxed construction makes this grapple ideal for demolition or material handling sites of all sizes. It's wide design securely moves odd shaped objects with ultimate dexterity.

**EX-CPG
EXCAVATOR PIPE GRAPPLE**

An ultra low profile design, the Craig Excavator Pipe Grapple is the best tool for loading and unloading pipe at the job site. Features great visibility for added safety and dual reinforced top clamps.

**EX-CMG
ROTATING MAT GRAPPLE**

Perfect for loading, unloading, and cleaning rig mats. The Craig Rotating Mat Grapple is the ideal tool to increase productivity and enhance matting capabilities. Features dual high torque motors for continuous 360° rotation.

**EX-SNBL
EXCAVATOR SNOW BLADE**

Utilizing a unique design with bolt-on cheek plates and replaceable edges, the Craig Excavator Snow Blade is the ideal dozer style blade for your excavator to clear snow from the work site.

**EX-HACB
HYDRAULIC ANGLING CHUCK BLADE**

The Craig Hydraulic Angling Chuck Blade is ideal for grading in clay or other sticky materials. Features a removable top that allows it to interchange with our Hydraulic Angling Clean Up Bucket for added versatility in grading applications.

EX-LCR
LAND CLEARING RAKE

For forestry, site preparation, and demolition - the Craig Land Clearing Rake works quickly to sort and clear large piles of debris. Profile is designed to carry and sort material efficiently.

EX-CBR
BRUSH CLEARING RAKE

The Craig Brush Rake is a medium duty rake designed for efficient moving and sorting of brush on the job site. The profile of the rake is optimized for working with brush and other loose material.

EX-RT
RIPPER/FROST TOOTH

More than just a frost tooth, the Craig Ripper Tooth is designed for extra heavy duty applications where other rippers fail. Engineered for maximum penetration, the double reinforced shank joins a gusseted, boxed lugging plate for unparalleled strength.

EX-CSS
STUMP SHEAR

Featuring dual reinforced ripper shanks and a heavy duty knife, the Craig Stump Shear allows you to easily get under stumps and remove rocks and debris from the root system.

EX-CCP
CONCRETE PULVERIZER

Designed for efficient crushing and sorting of concrete, the Craig Concrete Pulverizer uses the bucket cylinder on the excavator so no additional hydraulic lines are required. Comes with a brace and three hole bracket to be welded to the machine's stick. Pulverizer teeth are replaceable.

EX-LB
LEVELING BLADE

The Craig Leveling Blade is designed to allow the excavator to perform dozing, backfilling, and leveling tasks. Features a straight fixed blade that can be raised or lowered only. Leveling Blade will go below the depth of the tracks.

EX-CUT
DIRECT LINK THUMB

Our signature thumb, the Craig Direct Link Thumb features a four tooth inter-meshing design and boxed frame - custom tooth configurations available. Features superior grip and dexterity for day-in and day-out material handling with up to 120° of gripping rotation.

EX-PLT
PROGRESSIVE LINK THUMB

Delivering up to 180° of gripping rotation, the Craig Progressive Link Thumb offers the ultimate in maneuverability. Maintains gripping power throughout virtually the entire rotation of the bucket.

EX-CHT
HEAVY DUTY DIRECT LINK THUMB

Based on our signature Direct Link Thumb, the Heavy Duty Direct Link Thumb offers all the same great features as our standard thumb. Features a boxed construction and upgraded steel for added rigidity when working in tough applications.

EX-PMHUNIV
HYDRAULIC PAD MOUNT THUMB

The Craig Hydraulic Pad Mount Thumb is the perfect stocked solution for outfitting machines with a durable, easily installed, fully hydraulic thumb that is customizable to the specific tip radius of each machine.

EX-PMM
MANUAL PAD MOUNT THUMB

Available for 8 to 40 ton excavators, the Craig Manual Pad Mount Thumb is available in two and four tine configurations. Two lengths available to work with pin-on and pin grabber attachments. Comes standard with one storage location and two working locations on the strut bracket.

8.50 cubic yard Spade Nose Heavy Duty Rock Bucket on a Komatsu WA600. Bucket features teeth and segments, bolt-on side cutters, rock deflectors, and a plate style spill guard.

This attachment has worked in a quarry in Saugerties, New York since 2014.

LOADER ATTACHMENTS

WL-QKM QUIK KEY COUPLER

The Craig Quik Key coupler system allows for maximum work site and seasonal versatility. Change attachments in just seconds. "Bull nose" allows for easy alignment, even on uneven terrain.

WL-CVMC COMBO COUPLER (HOOK STYLE)

Offering superior visibility and minimal extension on the loader arms, the Craig Combo Coupler allows you to use your existing fleet of OEM specific hook-up attachments with no modifications on any brand of carrier.

WL-GP / WL-GPP GENERAL PURPOSE/PERFORMANCE BUCKET

A staple in any construction operation, Craig General Purpose Buckets have many uses around the job site. Custom options are available to properly outfit your General Purpose Bucket for your specific job site requirements.

WL-GP

The General Purpose Bucket is the result of over 70 years of field tested, proven design and manufacturing capability. Conventional side cutter design maximizes break-out force.

WL-GPP

Featuring a longer floor for efficient material loading, the Craig Performance Bucket is designed to load trucks faster than a conventional General Purpose Bucket. Convex side cutters offer fuel efficient loading and improved material retention. A European style spill guard protects the loader cylinders and linkages.

WL-LM / WL-WC LIGHT MATERIAL/WOOD CHIP BUCKET

Engineered to maximize your machine's capacity based on the material you're loading. The Craig Light Material Bucket is ideal for wood chips, saw dust, peat moss, snow, and any other light material you want to load to your machine's capacity.

WL-GP-M MULCH BUCKET

Available as narrow as 56", the Craig Mulch Bucket is designed to provide an accurate load capacity in the commercial sale of mulch. The deep, narrow design allows for accurate loading of quarter ton or half ton pickups. Heaped or struck capacity designs available depending on your operation.

WL-GCB GARBAGE CLAMP BUCKET

The Craig Garbage Clamp Bucket features two independently operated clamps that allow for large capacities of odd shaped and difficult materials to be handled efficiently for loading and sorting. Custom clamps available to work for specific applications.

WL-LMFS / WL-LMCS FEED LOT/CORRAL BUCKET

Features a large curved top clamp that is ideal for handling round bales, silage or manure in feed lot/corral style applications.

WL-HTLM / WL-HTWC
HIGH TIP LIGHT MATERIAL/WOOD CHIP BUCKET

Craig High Tip Buckets are designed to provide wheel loaders with additional dump height. On most machines you can increase your dump height to the OEM boom pin height allowing loaders to easily load live/walking floor trailers and hoppers without the need of a ramp.

WL-SDB
SIDE DUMP BUCKET

Ideal for tight spaces where conventional unloading is dangerous or not possible, the Craig Side Dump Bucket features a hydraulic cylinder and hinge point that allows the bucket to unload laterally while still allowing for conventional loading of the bucket.

WL-RBVHD / WL-RBSHD
HEAVY DUTY ROCK BUCKET

Built to withstand harsh environments and severe service, Heavy Duty Rock Buckets are reinforced with extra thick plate and feature extra wear protection on all wear surfaces. Available in a variety of configurations to fit your needs.

WL-CMP
MULTI-PURPOSE BUCKET

With a design that's been proven worldwide in military applications, the Craig Multi-Purpose Bucket is one of the best 5-in-1 loader buckets on the market. Made in Canada out of high quality steel materials, this bucket will transform your loader into an efficient multi-tool on any job site.

WL-SR
SKELETON ROCK BUCKET

The Craig Skeleton Rock Bucket is designed for separating rocks and other large materials from loose soil.

WL-CBX
BOXER BUCKET

Designed for clearing leaves, brush, and other light materials, the Craig Boxer Bucket opens to collect a wide path of material and then closes for easy gathering of the material. The material can then be easily dumped into a truck, bin, or hopper by opening the Boxer Bucket over the truck or storage location.

WL-CFB
FERTILIZER BUCKET

Similar to our standard Light Material Bucket, the Craig Fertilizer Bucket is designed to maximize the buckets struck capacity due to fertilizers inability to heap.

WL-CGS
GRAVEL SCOOP

Perfect for working in hard to reach areas, the Craig Gravel Scoop allows the operator to place loose material with precision - meaning less material lost. The Craig Gravel Scoop is ideal for loading aggregate into an excavator bucket or in areas where controlling material discharge is key.

WL-CLR
LAND CLEARING RAKE

The Craig Land Clearing Rake transforms your loader into a versatile land clearing tool. Perfect for working with logging slash for biomass fuel collection and site preparation for re-planting.

WL-CLR2-2W
PALLET CRUSHER

Recycling pallets is made easy with the Craig Pallet Crusher. Based on the design of the Craig Land Clearing Rake, the Pallet Crusher allows you to easily pick up, crush, and recycle old pallets.

**WL-CPF
PALLET FORKS**

Our standard hanging tine fork design for wheel loaders, Craig Pallet Forks feature manually adjustable forks and tine keepers to prevent the fork tines from swinging away from the frame.

**WL-HAF
HYDRAULIC ADJUSTABLE FORKS**

Change tine spacing on-the-fly from inside the cab with the Craig Hydraulic Adjustable Pallet Forks. This hanging tine design features two synchronous cylinders to ensure smooth operation.

**WL-CBF
CAR BODY FORKS**

Specially designed for salvage and recycling yard applications, this extra long fork is ideal for moving and sorting cars and light trucks. Custom sizes available upon request. Features hanging non-adjustable tines that are easy to replace.

**WL-CRF
CRAIG ROCK FORKS**

Craig Rock Forks are designed for moving large rocks in quarry applications. Built to withstand the severe duty of quarry applications, Craig Rock Forks feature hanging non-adjustable tines that are easy to replace.

**WL-CUF
CRAIG UTILITY FORKS**

A light duty fork for machines that are not dedicated material handlers, Craig Utility Forks feature a high visibility back frame and adjustable hanging tines.

**WL-CPF-SC
SHIPPING CONTAINER FORKS**

Based on our standard Pallet Forks, Craig Shipping Container Forks feature a wider back frame designed to allow the forks to line up with fork pockets on shipping containers. Hydraulic adjustable fork design available.

**WL-SL
SAW LOG GRAPPLE**

Designed and tested under severe working conditions in the heaviest logging mill applications. This grapple is a time-proven winner for the sorting and moving of tree length or bolt length logs. General purpose, unloading, and sorting style configurations available.

**WL-CLLF2
LOG AND LUMBER FORK**

The Craig Log and Lumber Fork is a do-it-all job site tool for the mill operator who has a variety of requirements for their loader. Excellent for handling tree length or bolt length logs, the Craig Log and Lumber Fork also features 'L' shaped tines for handling stickered lumber and loaded lifts.

**WL-CPG2
PIPE GRAPPLE**

The Craig Pipe Grapple for wheel loaders is designed to work with all standard oil field pipe. Features a low profile design that is the ultimate in high visibility. Hydraulic hoses are hidden and protected within the frame for increased longevity.

**WL-CMG
MAT GRAPPLE**

Designed for work in the oil fields, the Craig Mat Grapple for wheel loaders is the perfect tool for moving drilling mats around the job site.

WL-HTK
HANGING TINE KIT

Hanging Tine Kits can be added to almost any Craig wheel loader bucket. Utilizing a bar and hook design, you can easily pick up and release the forks without ever leaving the cab. Ideal for machines without a quick coupler to quickly switch between using the bucket to a set of forks.

WL-SNB
SNOW BASKET

A slotted design creates a large capacity, light weight bucket for efficient handling. The slots allow air to escape when pushing into a large mound of snow - ensuring a full bucket. The slots also help to prevent snow from becoming packed into the bucket and not emptying when dumped.

WL-QA
QUIK PIK REAR POST BRACKET

Available as an optional add-on for the Craig 301 Wing Assembly, the Quik Pik Rear Post Bracket allows the complete push pole assembly, wing, and plow to be disconnected from the loader by a single person without tools in just minutes.

WL-CSP
SNOW PUSHER

Clear large paved surfaces up to three times faster with one of our rugged Snow Pushers. Constructed specifically for parking lot and airport runway usage, our design incorporates a precision back frame for maximum strength and ease of hook up.

WL-RCS
RAMP CLEARING PLOW

Keeping airport ramps clear and safe around North America, the Craig Ramp Plow is custom engineered for ease of use and efficient snow handling. Available in extra wide widths, these plows can be ordered with a variety of cutting edges including rubber to protect the tarmac.

WL-QKS8
CRANE BOOM

Bucket lift hooks can be dangerous, they're also inefficient. Reach further, more accurately and with better visibility by using the Craig Crane Boom. Available in 2-section or 3-section configurations. Hydraulic and manual extension available.

WL-301
HYDRAULIC SNOW WING ASSEMBLY

Featuring a hydraulically operated design, the Craig Hydraulic Snow Wing Assembly is a standard among many municipalities across North America. Available with our integrated style plow harness for maximum visibility or our chain lift style plow harness for increased versatility.

WL-HTS
HYDRAULIC TRIP SWIVEL

Protect your wing assembly with this cab resettable hydraulic trip swivel. Replacing the standard bell swivel on the front post, this unit uses hydraulics to allow the moldboard to trip when it strikes an obstacle.

WL-SP-EXT
EXTENDABLE SNOW PUSHER

Ideal for contractors who plow large parking lots and yards, the Craig Extendable Snow Pusher gives you a large cleared path that can be hydraulically adjusted for traveling between job sites.

WL-BFH
BACKFILL BLADE

This dozer blade's wide cylinder stance provides maximum hold strength while dozing. The cutting edge is gusseted between each mounting hole and a smooth boxed back frame keeps the moldboard light and strong.

In the mid 50's Craig Manufacturing was the first company to put a wing assembly on a wheel loader. Ever since this historic event we've continued to innovate and refine our industry leading design. The perfect curvature of our wing moldboard is still based on the magic formula for snow curl and discharge we have used since day one.

PARTS &

CUSTOM MANUFACTURE

CTURING

STOCKED PARTS, FAST DELIVERY

When things go wrong and you need parts fast, you can count on Craig Manufacturing to have them in-stock. Craig has a full stock of parts and wear components at all three branch locations across Canada to keep our customer's attachments working for them.

If you find yourself in need of parts, call the Craig Customer Support Center today. With same day shipping on most parts and wear components, we can get your attachments back up and running in no time!

MORE THAN JUST ATTACHMENTS

Craig Manufacturing offers a wide variety of custom manufacturing and custom engineering services that expand far outside just custom heavy equipment attachments. Custom manufactured products and services include:

- Complete machine guarding packages
- Third member booms for excavators
- Bed liners for off highway rock trucks
- Excavator stick modifications

Call the Craig Customer Support Center today to learn more about custom manufacturing services offered by Craig Manufacturing.

Caterpillar 16M motor grader featuring a Craig 501 Series fully hydraulic heavy duty snow wing assembly.

This attachment has worked at a mine in Northern Quebec since 2008.

GRADER ATTACHMENTS

MG-100 / MG-107 PLOW HARNESS

This Plow Harness will accept all Craig models of snow plows and blades including one ways, vee plows, reversibles, and dozer blades. Down pressure options available.

MG-100UNIV UNIVERSAL PLOW HARNESS

The Craig Universal Plow Harness features all of the great rugged design features of our standard Plow Harness while allowing you the flexibility of picking up all Craig, Champion, and Viking style plows.

MG-0KMG PARALLEL LIFT GROUP

The ultimate in work site and seasonal versatility, the Craig Parallel Lift Group allows you to change grader attachments in seconds. Female blanks available for converting existing attachments.

MG-300 POSTLESS WING ASSEMBLY

Designed for maximum operator visibility, this wing assembly uses a parallel design front lift arm to provide up to 40" of level benching height. Postless design allows access to both grader doors to remain unobstructed for added safety.

MG-300SS POSTLESS SEVERE SERVICE WING ASSEMBLY

The ultimate in grader snow removal gear, the Craig Postless Severe Service Wing Assembly offers the same great operator visibility and safety as our standard Postless Wing Assembly in a severe service package. Ideal for heavy snow fall areas and the forestry industry.

MG-301 HYDRAULIC WING ASSEMBLY

The standard Craig wing design, the Craig 301 Hydraulic Wing Assembly for motor graders has been proven around the world since the 1980's. Available with a 12', 13' or 14' wing moldboard.

MG-301SS SEVERE SERVICE WING ASSEMBLY

The Craig 301 Severe Service Hydraulic Wing Assembly comes with all the same great features as our standard 301 Hydraulic Wing Assembly in a severe service package. Ideal for heavy snow fall areas and the forestry industry.

MG-301US UNDERSLUNG WING ASSEMBLY

The Craig 301 Underslung Wing Assembly offers increased visibility and moldboard angle over the standard 301 Wing Assembly. The front post is mounted behind the articulation point, allowing the grader to maintain a full range of motion. Available on most machines.

MG-302 HIGH LIFT WING ASSEMBLY

Extend the capabilities of your grader with an all hydraulic high lift rear post wing assembly. Featuring 60" of level benching height, this assembly allows operators to double bench snowbanks for more efficient plowing in high snow fall areas.

MG-302FM FRONT MOUNT WING ASSEMBLY

Craig 302 Front Mount Wing Assemblies are designed to mount to the grader ahead of the articulation point. This allows for superior traction and visibility.

MG-HTS / MG-MTS
HYDRAULIC/MECHANICAL TRIP SWIVEL

Protect your wing assembly with a Craig Trip Swivel. Hydraulic and Mechanical options available to protect your wing assembly. Trip swivels allow your wing moldboard to trip when striking an obstacle. Hydraulic option can be reset from the cab. Mechanical option will require the wing to be lifted off the ground to be reset.

MG-850
STRAIGHT FIXED DOZER BLADE

Available in 8', 9', and 10' blades, this fixed dozer blade works with our standard lift group plow harness.

MG-851
MANUAL ANGLING DOZER BLADE

Available in 10', 11', and 12' blades, the Craig Manual Angling Dozer blade offers 30° of angle in both directions for maximum versatility. 851 Manual Angling Dozer Blades require a Parallel Lift Group.

MG-WEIII
SERIES III WINDROW ELIMINATOR

The lightweight solution for reclaiming the road shoulder. Features an integrated swing frame and radial lift system.

MG-CS-FM
FRONT MOUNT SCARIFIER

Break up compacted material to facilitate grading with the Craig Front Mount Scarifier. Bolts directly to the nose of the grader and includes a parallel lift linkage to ensure even ground penetration. Features a 'v' style scarifier head for efficient breaking up of material. Ripper shanks/teeth not included.

MG-USG
UNIVERSAL SNOW GATE

Mounting to the factory circle moldboard, the Craig Universal Snow Gate allows the operator to momentarily interrupt the flow of snow to avoid filling driveways and intersections.

MG-850-CH
CHAMPION STYLE DOZER BLADE

The Craig Champion Style Dozer Blade uses a time proven design that offers a rugged hook-up, two stabilizing arms, and a down pressure strut. Comes standard with end gates to stop material from flowing over the edges of the moldboard.

MG-WEII
SERIES II WINDROW ELIMINATOR

A rugged solution for reclaiming the road shoulder. The Series II Windrow Eliminator features a robust design with a parallel lift system. Eliminates the need for an extra pass, saving time and energy for your operation.

MG-FENDERS
CUSTOM STEEL FENDERS

Front, rear, and complete sets available. These heavy duty steel fenders will stand up to the harshest conditions. Steel fenders are designed to work with tire chains.

MG-CS-FMH
FRONT MOUNT SCARIFIER HEAD

The Craig Front Mount Scarifier Head features lift hooks to work with the Craig Parallel Lift Group. Features a 'v' style scarifier head for efficient breaking up of material. Ripper shanks/teeth not included.

SNOW PLOWS

CMD-750 750 COMMANDER PLOW

Ideal for backhoes and small wheel loaders up to a 2.00yd bucket capacity. The 750 Commander Plow features a modular hook-up design that allows hook-ups to be interchangeable between the 750 and 1000 Series of plows.

CMD-1000 1000 COMMANDER PLOW

The 1000 Commander Plow is ideal for medium sized wheel loaders with a bucket capacity ranging from 2.00yd to 3.50yd. A modular hook-up design allows for hook-ups to interchange between the 750 and 1000 Series of plows.

T4900WP/T0600WP SERIES FOLDING WING PLOW

The Craig Folding Wing Plow is designed to be the ultimate multi-function snow fighting tool. The end gates allow it to be used as a reversible plow, box plow, and back dragging plow. Available for backhoes and medium sized wheel loaders with a bucket capacity ranging from 2.00yd to 3.50yd.

4900 SERIES REVERSIBLE PLOW

Craig 4900 Series Reversible Plows are efficient mid-weight plows ideal for mid-size machines working in standard snow conditions.

0600 SERIES REVERSIBLE PLOW

The result of over 70 years of design improvements, this reversible plow is the industry leader in snow equipment for wheel loaders. A full floating frame, with down pressure arms, follows the contour of the road both laterally and horizontally to ensure maximum contact.

6900 SERIES HEAVY DUTY REVERSIBLE PLOW

Similar in design to our 0600 Series Reversible Plow, the 6900 Series is a rugged reversible plow for heavy snow conditions.

1072 SERIES ONE WAY PLOW

A rugged one way for today's high speed machines, the Craig 1072 Series One Way Plow comes equipped with a solid push frame and triangular trip mechanism. This plow is ideal for heavy public works use.

1073 SERIES HEAVY DUTY ONE WAY PLOW

The result of more than 70 years of working hand-in-hand with Department of Transportation representatives across North America, the Craig 1073 Series One Way Plow is the absolute best in high speed snow removal.

683 SERIES HIGH SPEED ONE WAY PLOW

Featuring a very aggressive conical moldboard, this plow has been designed specifically for highway use. The large difference between intake and discharge heights results in superior snow curl and discharge at high speeds.

REV-EXT EXTENDABLE REVERSIBLE PLOW

The Craig Extendable Reversible Plow is ideal for contractors who plow large parking lots and yards. The hydraulically adjustable width allows it to be an efficient snow removal tool with a wide cleared path that is safe for travel between jobs.

REV-V FOLDING VEE PLOW

A versatile multi-position plow, the Craig Folding Vee Plow is capable of acting as a vee plow, inverted vee plow, straight blade, or angled blade.

630 SERIES VEE PLOW

Used exclusively for opening some of the worst roads in the north, the Craig 630 Series Vee Plow is one of the most rugged vee plows on the market today. This plow has been, and continues to be, a mainstay of government and private industry.

THE CRAIG ADVANTAGE

STAFFED WITH INDUSTRY PROFESSIONALS, THE CRAIG CUSTOMER SUPPORT CENTER IS READY TO HELP YOU WITH YOUR HEAVY EQUIPMENT ATTACHMENT NEEDS.
