## TRUEGRIP PIN GRABBER

### FEATURES AND BENEFITS

The Craig TrueGrip pin grabber has a simple and reliable design. It features 2 independent locks and has visual safety indicators that allow the operator to ensure both the front locking knuckle and rear latch are engaged. Works with most OEM Coupler Kits (contact Craig for details) or can be supplied with a Craig hydraulic kit.

#### **MULTI-PIN CENTRE**

Features a multi-pin design to pickup attachments from most OEMs in the same machine category. (See Compatibility Chart)

#### **2 INDEPENDENT LOCKS**

Coupler is designed with machine specific dual independent locks to ensure attachment is retained even if the coupler loses hydraulic pressure. ISO 13031:2016 COMPLIANT coupler design when used with an ISO 13031 Compliant hydraulic kit. The locking mechanism is automatic and the operator can perform a visual check to confirm that the locks are in place.

#### **FORWARD OR REVERSE**

Attachments can be picked up in forward and reverse orientations.

## LOW MAINTENANCE

The single cylinder design and minimal moving parts makes the coupler easy to clean and with very little maintenance needed. No greasing required.

## HYDRAULIC KIT OPTIONS

1. Use existing machine coupler hydraulic kit – see Craig terms and conditions to confirm kit details
2. Craig Stick mounted hydraulic kit – designed for easy install with only electrical connections back to the cab
3. Craig ISO 13031:2016 compliant kit – lines run back to tank

## LIFTING EYE

This coupler is designed with a rated lifting eye at the rear of the coupler. An added benefit to the operator to lift and place materials easily using the coupler.

*Always use the lift eye on the coupler with attachments removed. Furthermore, never use the lift eye on attachments when it is coupled to this coupler.*
