

EXM-ISO-CWL

ISO CONVERTIBLE WEDGE LOCK COUPLER

We have taken our proven convertible wedge lock coupler and made it ISO13031 compliant. It continues to provide a light weight, low profile design that maintains your machines OEM tip radius while offering a quick coupling system so you can switch between attachments without having to leave the cab. The coupler has an automatic safety lock that ensures continual engagement even in the event of loss of hydraulic pressure.

- Offers a solid, safe and secure hook-up
- Self adjusts for coupler wear
- ISO 13031:2016 compliant coupler design when sold with a Craig “fully independent coupler kit” (hydraulic lines and control valve run back to engine compartment and hydraulic tank.)
- Optional safe working load rated lift eye available
- Visual locking indicator to identify attachment is engaged
- Automatic safety locks, does not require safety pins to be inserted after engaging attachment.
- Coupler can be converted back to a manual version if needed (optional manual kit required).
- Made in North America
