

## MG-301US

# 301 UNDERSLUNG WING ASSEMBLY

Based on our popular 301 Wing Assembly, the Craig 301 Underslung Wing offers increased visibility and moldboard angle over the standard 301. The front post is attached behind the articulation point, allowing the grader to maintain a full range of motion while turning left or right with the wing in any position.

- Available with a 12, 13 or 14 foot moldboard
- 30" level benching height
- Hydraulic push pole adds up to 22" (standard) of increased reach
- Mechanical floating front slide allows constant road contact
- Wing moldboard features rugged box style construction for maximum strength and light weight
- Provides excellent flow from grader moldboard
- Fully hydraulic design (no cables)
- Maintain the ability to access the cab from either side
