## QUIK KEY COUPLER

The Craig Quik Key coupler system allows for maximum work site and seasonal versatility. Change attachments in just seconds. Purchase our female blank to add to existing attachments or other heavy job site items that need to be moved frequently.

- Single point self aligning pickup centers the coupler easily, even on uneven terrain
- Large contact area spreads the load over a wide surface for strength
- Works with all Craig Quik Key attachments built for machines within the same size category
- Hardened steel wrist pin pressed into lock pin allows up to 10° of movement to improve alignment and connection strength as coupler parts wear
- Pin assembly is available with grease fittings
