## **HEAVY DUTY ROCK BUCKET**

### **FEATURES AND BENEFITS**

Built to withstand harsh environments and severe service, Heavy Duty Rock Buckets are reinforced with extra thick plate and feature extra wear protection on all wear surfaces. Available in a variety of configurations to fit your needs.

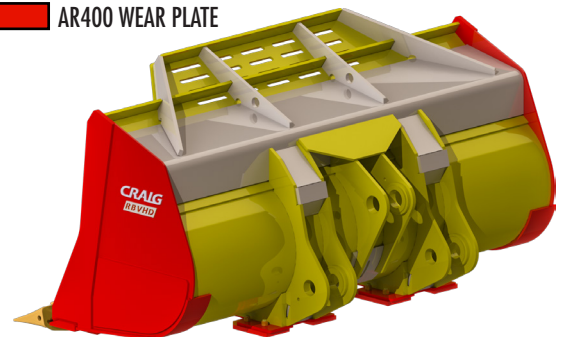

### **HEAVY DUTY APPLICATIONS**

Designed to work in shot rock and other demanding high impact, high abrasion applications, the Craig Heavy Duty Rock Bucket is the toughest bucket your loader will ever need. Custom designs available to optimize the bucket for your specific heavy duty application.

### **WEAR PLATE**

Heavy Duty Rock Buckets feature extra thick wear plate and AR 400 wear protection on all wear surfaces. Weld-on cheek plates come standard for additional bucket protection.

-  44W PLATE
-  AR100 WEAR PLATE
-  AR400 WEAR PLATE

Materials typically used in the construction of a Heavy Duty Rock Bucket.

### **DESIGNED TO LAST**

When buying an attachment to work in heavy duty, high wear applications you expect an attachment that is going to stand up. Craig Manufacturing builds each Heavy Duty Rock Bucket with high quality wear plate to ensure the bucket has a long life. Strict weld procedures and inspection processes are implemented to ensure these buckets can perform day-in and day-out in the application they're designed for.

## SPILL GUARD

Features a plate style spill guard with visibility slots to allow the operator to see the edge when the bucket is in the carry position and still retain material. The spill guard also helps to protect the machine linkage.

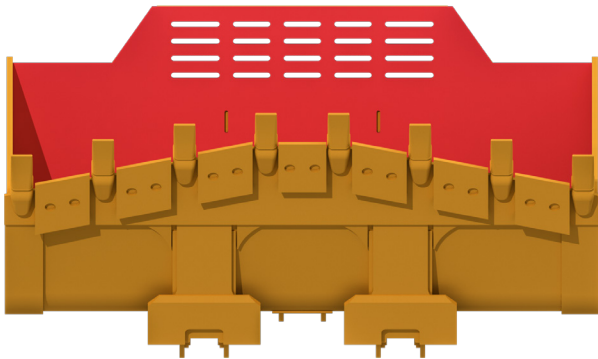

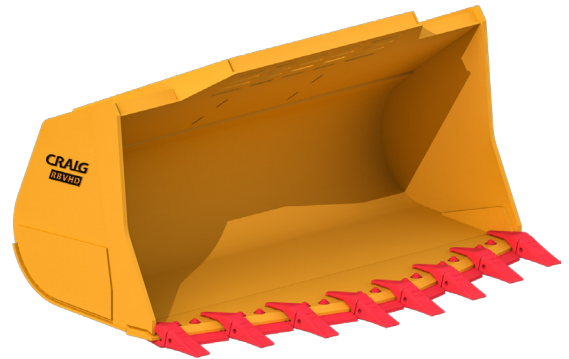

Plate style spill guard comes standard on the Heavy Duty Rock Bucket.

OEM and aftermarket G.E.T. available to work with your application.

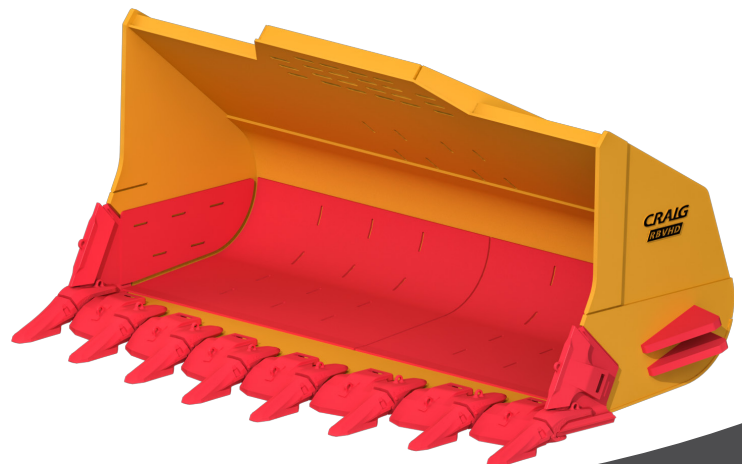

## G.E.T. AVAILABLE

The Craig Heavy Duty Rock Bucket has a variety of G.E.T. available to work with your application. Bucket comes standard with a bolt-on edge installed. Weld-on teeth, bolt-on segments, weld-on segments, and half arrow segments available upon request – pricing may vary.

## CUSTOMIZABLE

To stand up to your specific needs, the Craig Heavy Duty Rock Bucket is customizable so you can get the options you need to keep your bucket working for you. Options include side bar protectors, bucket liners, end plate liners, tire kickers, as well as a variety of edge configurations – semi-spade (RBVHD), full spade (RBVHD), or straight (RBSHD) available. Custom wear solutions available for your specific needs.

Bucket shown with AR400 bucket liner, AR400 end plate liners, tire kickers, side bar protectors, weld-on teeth, and bolt-on segments.
