

## WL-HT HIGH TIP BUCKET

Increase the dump height of your wheel loader with a Craig High Tip Bucket. On most machines you can increase your dump height to the OEM boom pin height allowing for applications such as loading high-side trucks without the need of a ramp.

- Dual cylinder design with cushion valve for smooth operation
- Visibility slots for accurate loading
- Flat bottom design allows easy penetration and loading
- Available in Craig Quik Key, OEM coupler and Pin-on configurations
- AR400 ramp plates for better wear and longer attachment life
- Drilled to accept dealer specified edge, installed
- Optional third valve required on machine
- New tunnel reinforcements
- Deflectors to eliminate buildup and cross contamination
- Grease fittings have been repositioned for safer and better greasing allowing users to grease while the bucket is on the ground, so that operators don't have to get under the bucket
- Hinge pins have been redesigned and repositioned to reduce material buildup inside the bucket.
