

PART SALT SAVER

Follow the true contours of the road with the new Salt Saver live edge system – now available on all Craig Manufacturing snow plows and wings. Designed as a cleaner, greener plow edge solution, the Salt Saver is designed to follow uneven paved surfaces for improved snow removal over a traditional style edge.

- Better scraping means less salt needs to be used.
- Designed to follow uneven paved surfaces for improved snow removal over a traditional style edge.
- The rubber pad holding the edge absorbs the vibration, and reduces overall wear on the equipment.
- Easy to install and replace which saves time.
- No metal on metal contact meaning there is less noise resonating through the cab.
- Custom one-piece forged steel wear edge supports a custom tungsten carbide insert that is brazed into the bottom surface.
- Each 12" section is only 11 pounds and can be easily replaced to extend wear life.
