

WL-SNB SNOW BASKET

Slotted design creates a large capacity, light weight bucket for efficient handling. The slots also allow air to escape when pushing into a large mound of snow – ensuring a full bucket. They help release snow when dumping, and allow water to escape when moving slushy or water-logged snow.

- Double the capacity of your loader
- Bolt-on, reversible cutting edge ensures long life
- Available in Craig Quik Key, OEM coupler and Pin-on configurations
- Superior operator visibility
